

# 6½ DIGITAL MULTIMETER MODEL 12061

#### **Solution for General Instrument Measurement**

6½ Digital Multimeter is the most frequent used measurement instrument in Electronic industry. Chroma 12061 provides a combination of speed, accuracy and high performance measurement functions that can be used either solely or with system to meet your requirements swiftly.

Chroma 12061 offers the resolution and specification of the same class in the industry plus enhanced speed and accuracy it turns into the best solution for various kind of basic measurements. A brand new design was made for the operating interface of Chroma 12061. The commonly used functions can be selected with a single button pressed that increases the panel accessibility greatly.

#### **Fast & High Performance**

The 12061 6½ Digital Multimeter has assorted settings of resolution, integration time and ranges that allows users to optimize the configuration of measurement speed, resolution and accuracy when in individual measurement test mode.

The 12061 has built-in a high speed, low interference A/D converter with a maximum speed of 2000 rdgs/s, it is the best solution for high speed measurement.

## **Individual Application**

Chroma 12061 is equipped with 11 types of measurement functions which contains DC voltage/current, AC voltage/current, resistance 2/4-wire ohms, period, frequency, diode, continuity and temperature as well as diverse math functions of NULL, Max/Min/Avg, High/Low limit, High/Low limit, Percentage/Ratio/MX+B, dB/dBm, etc. Along with trigger and memory functions, Chroma 12061 is the right tool for you to perform the basic measurement.

# **Test System Application**

For user's convenience, Chroma supports various softwares for different control platforms.

# 61/2 Digital Multimeter

# **MODEL 12061**

## Key Features:

- 6½ digits resolution
- 11 types of measurement characteristics
  - DC voltage/current (1000V/3A max)
  - AC voltage/current (750V/3A max)
  - Resistance 2 or 4-wire ohms measurement
  - Period & frequency
  - Diode & continuity
  - Temperature
    (Thermocouple & RTD)
- Various math functions
  - NULL
  - Max/Min/Avg
  - High/Low limit
  - Percentage/Ratio/ MX+B
  - dB/dBm
- DC voltage accuracy: 0.0015%
- AC voltage accuracy: 0.04%
- Optional Multi-point TC Scanner Card (10ch), multi-point scanner card (10/20ch)
- Measurement and data transmission up to 2000 readings/sec (4½)
- Up to 2000 readings memory storage
- Standard SCPI control
- Standard USB interface, support USBTMC
- Optional GPIB interface
- Software control support
  - Chroma 12061 software
  - LabView® Driver

## **BUILT-IN USB (USBTMC SUPPORTED)**

Different from the traditional interface, Chroma 12061 uses USB as its standard feature that not only improves the transmission speed but also makes the connection more easier with the plug and play functions.

The USB interface fully supports USBTMC (USB Test & Measurement Class). As long as the instrument is equipped with USB interface that supports USBTMC, it can communicate with PC in real time via VISA driver without the restrictions of platform and environment. USBTMC is a communication protocol built on top of the USB and uses GPIB-like methodology to communicate with USB. Therefore, from user's point of view by using USB should be as simple as using GPIB.

#### PASS/FAIL SIGNAL OUTPUT

Chroma 12061 can provide PASS/FAIL signal to system by USB port (either communication or PASS/FAIL signal) with high/low limit set. USB type B female connect to system with signal (1 floating/ 2 PSS/ 3 FAIL/ 4 GND) in 2ms low and please disable USB interface. If result over the high/low limit, the beeper will alarm and signal output. (Beeper can be off)

#### TEMPERATURE MEASUREMENT

Chroma 12061 has temperature measurement function that supports 7 kinds of Thermocouples:E, J, K, N, R, S, and T type. It also supports RTDs 4-wire measurement. The built-in ITS-90, IEC751 and Callendar-Van Dusen temperature conversion can satisfy the diverse measurement requirements of yours.

## **MULTI-POINT SCANNER CARD**

#### Multi-Point Scanner Card (10ch/20ch)

Chroma  $6\frac{1}{2}$  Digital Multimeter supports Multi-point Scanner Card which is a scanning measurement tool not supported by most of the  $6\frac{1}{2}$  Digital Multimeters in the field. Multi-point Scanner Card offers multiplexing ten two poles (ACV, ACI, DCV, DCI, Resistance, Period, Frequency) that can be installed on the extension card option directly of the rear panel.

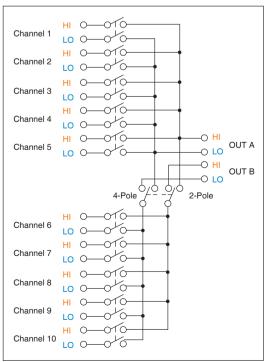

#### Multi-Point TC Scanner Card (10ch)

The multi-point temperature scanning card has multiple functions including 2-wire/4-wire resistance, AC/DC voltage/current, frequency, period and temperature measurements. As cold junction compensation is equipped for temperature measurement, it increases the measurement accuracy greatly. In addition, it can scan the temperature of 10 different channels that can be applied extensively to electronic devices and industrial studies for temperature measurement

# SOFTPANEL

Chroma 12061 TOOL and Chroma 12061 LINK are two free softpanels provide with data collection and drawing for analysis.

#### **CHROMA 12061 TOOL**

- Real-time display interface for value monitoring
- Data log and output in CSV format for analysis

#### **CHROMA 12061 LINK**

- Softpanel toolbar open with EXCEL or WORD
- Real-time data transferring to computer directly and save it to EXCEL or WORD format
- Create data patterns in EXCEL format automatically
- Test engineers can use ActiveX components to control the 12061 using SCPI commands

# PANEL DESCRIPTION

2 9 13 14 10 11

- Easy-to-read display with 5X7 matrix triple colored double-line screen that can identify the meaning of data and symbol easily
- 2. Easy-to-switch function keys
- 3. 2 or 4-wire ohms measurement
- 4. Built-in frequency, diode, continuity and temperature measurement capability
- 5. Fast TRIGGER control
- 6. Data storage memory
- 7. Math calculation
- 8. Fast range changes
- 9. Optional Scanner Card
- 10. USB Interface supports USBTMC
- 11. GPIB Interface

- 12. 7A/250V Fuse
- 13. Measurement completed signal output terminal for automatic operation
- 14. External triggered input terminal for automatic operation

## ORDERING INFORMATION

12061:61/2 Digital Multimeter

**12061**: 6½ Digital Multimeter with GPIB **A120000**: Multi-point Scanner Card (10ch) **A120001**: Thermal-measurement Adapter

A120002: Multi-point Scanner Card (20ch)

**A120003:** HV Probe (1000:1)

A120004: Multi-point TC Scanner Card (10ch)
