

# MULTIPLEXER SWITCHES

Switching Series | PXIe Test And Measurement Suite

## SMX-3XXX SERIES

The VTI Instruments SMX-3XXX Series of multiplexers deliver exceptional performance and reliability by implementing extensive signal path shielding and isolation. Available models with software configurable switch subsystems increase flexibility and help control costs by allowing a single module to be used for different testing requirements. Embedded virtual schematic control further simplifies setup and debugging, allowing all relays to be engaged independent of application software. Ideally suited for medium-to-high density automated test systems (ATE), the SMX-3XXX Series provides uncompromised measurement integrity ideal for the most demanding aerospace, defense and automotive applications.
