What is the R&S®RTB-PK1 application bundle?

The R&S®RTB-PK1 application bundle unlocks the rich functionality of the R&S®RTB2000 oscilloscopes. This very attractively priced bundle includes all currently available software options (I²C, SPI, UART/RS-232/RS-422/RS-485, CAN, LIN, history and segmented memory mode) as well as the arbitrary waveform generator and pattern generator hardware option.

What are the benefits of the R&S®RTB-PK1 application bundle?

You get the full functionality of all the trigger and decode options for the R&S®RTB2000 oscilloscopes.

- ▶ Bus setup in seconds with the app cockpit
- ▶ Telegram display as color-coded bus signals and decode table
- ▶ Strong trigger and powerful search and navigation capabilities

The bundle also equips your R&S®RTB2000 oscilloscope with 160 MSample memory, the by far largest segmented memory in its class.

- ▶ Capture longer periods of time at a fixed sample rate
- ▶ Maintain a faster sample rate over a constant period of time
- ▶ Capture bursts of activity surrounded by long periods of dead time

Buy a new R&S®RTB2000 series oscilloscope between August 1, 2023 and March 31, 2024 and save 50% off the list price on the R&S®RTB-PK1 application bundle
